

WPC CATALOGUE

"Strong, Stylish, Sustainable – The
Perfect Flooring Solution!"

TVA Enterprises - WPC Flooring

CO-EXTRUSION. PREMIUM TECHNOLOGY

Co-extrusion WPC decking is a capped wood plastic composite product, which means it has a very thin plastic protection layer to cover the co-extruded core layer. The protection and core layer are extruded together under a very high temperature mold simultaneously.

It retains the advantage of traditional composite products. Meanwhile, with this advanced protection layer, it gives the board better properties than conventional composite decking as below.

- Messes can be easily cleaned up because the liquid never gets absorbed by the protection layer, which makes co-extruded composite decking very easy to clean
- Better resistant to mildew and splitting, so lifespan is longer
- The protection layer ensures its color stays much longer
- Wear resistance and scratch resistance of the co-extrude composite decking are better than traditional composite decking

"Enhanced Durability,
Effortless Clean, Lasting
Beauty – Co-Extrusion WPC
Decking!"

- **UNIQUE INNOVATIVE TECHNOLOGIC SYSTEM**

It is a capped co-extruded composite, encased in a technologically advanced shield that covers the central core. The shield and the core are coextruded in order to avoid the use of glues or chemical substances that could damage the environment. Equally, the co extrusion process ensures extremely high standards of performance

- **SHIELD TOTAL PROTECTION**

100% polymeric external shield, which encapsulates the board in a protective waterproof film that is highly resistant to scratches, stains and fading over time.

- **ECO SUSTAINABLE MATERIAL**

It is instead of ultra shield is an eco-sustainable product. It is 95% composed of recycled materials, including recycled hardwood fibres that have no impact on deforestation.
